OFFICE SOLUTIONS

SIERRA STAXIS

TILED BASED WORKSTATION SYSTEM

Sierra's Staxis tiles are easily fitted by hand without clips following the installation of the frames and services.

The unique screen fixing method allows simple re-configuration quickly and without damage to any componentry, requiring only an allen key to install.

Designed with flexibility in mind, Staxis provides the option for your office to grow as your business grows.

With solutions as simple as low level partitioning for ease of communication.
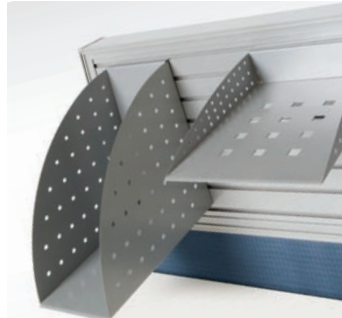

SIERRA STAXIS
ACCESSORIES

FUNCTION TILE

Paper management system with accommodation for paper trays, pen holders, magazine holders and telephone trays. Hook on accessories can be supplied in powder coated metal.

TILE REMOVAL

Staxis tiles are easily removed with the lever provided. To re-install simply slide into upper frame first and drop into position.

WORK TOPS

Available in melamine, laminate or timber 25mm or 33mm thick with a variety of edge details.

PEDESTALS

Mobile or fixed pedestals are available in timber, laminate or metal.

SHELF

Infinitely height adjustable, shelves are available in metal, timber or laminate. Dividers are optional.

WHITE BOARD

Available in tile modules or surface mounted to selected size.

GLAZING

Single or double glazing is available, slimline venetian blinds are an option.

PINNABILITY

A fabric covered pinboard tile is an available option.

POWER AND COMMUNICATION

Outlets are flush mounted on the face of metal service access tiles.

POWER POLES

SCREENS

Sierra's Screens are 75mm thick, recyclable aluminium framed, with slide in tiles. All framing and metal brackets can be powder coated to selected colour. No plastics are used. The simple unique joining method requires only an allen key to effect a full height positive link between panels.
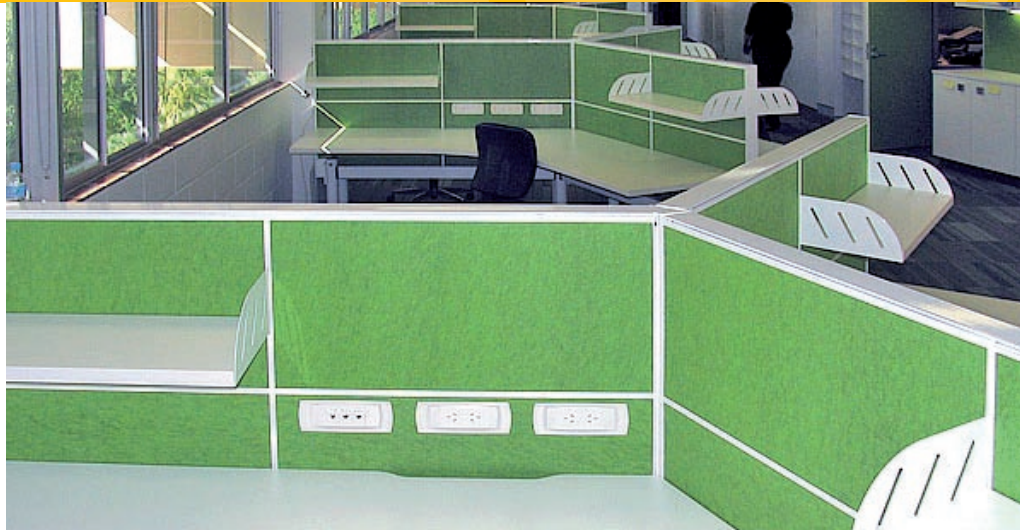

Tiles can be upholstered, melamine, glazed, MDF, white board, perforated metal or timber veneered. They are easily changed.

Standard Staxis installations are installed with a one piece frame. Tile modules can be easily added to increase screen height.

Where height reduction may be required the base module height must be specified. Recommended base module is 1200mm or 800mm high. Tiles, usually in 400mm modules, are added to achieve required heights.

Full height walls can be constructed with Staxis.

WIRE MANAGEMENT

Power poles are 75x75mm and are normally positioned at a junction, but can be placed at any point.

CABLE MANAGEMENT

Services access collars and under desk cable tray options are available for concealing excess cable. Brush seal or hinged flap options are available to provide access to under desk cable tray.

WORKSURFACES

Tops are 25mm or 33mm as required, in melamine, laminate or timber veneers.

Sizes and shapes to suit requirements.

Height adjustment tops are infinitely height adjustable when screen hung.

STORAGE

Hampers, shelves and function wall widths are available to suit screen module sizes in either metal or melamine, screen or wall mounted, and are infinitely adjustable within the height of the screen.

Pedestals include pencil trays and filing frames.

All drawers are on metal runners, locks fitted as required.

SIERRA'S STAXIS WIRING SYSTEM

Wiring is automatically segregated by the frame construction. Hence power and data/voice run through different levels of the screens.

Staxis can be hard or soft wired and services can be located above or below work tops.

Staxis can be wired horizontally and vertically to national standards including category 6.

ECO TECH
